Features

- Available in 2"x3", 3"x4" and 4"x5"
- Fits most residential applications
- High-Quality aluminum made in the USA
- Rust-free construction
- Bake-on finish for low maintenance
- Available in over 20 colors
- Requires fasteners to install

Bay Strip Miter

Description

TopShield[®] Aluminum Bay Strip Miter is designed to work for 45-degree angle corners.

Features

- Available in both inside and outside design
- Sizes include 5 inch, 6 inch and 7 inch
- Aluminum construction for a rust-free experience
- Baked-on finish for low maintenance
- More than 20 colors available
- Durable design for a longer lasting performance
- Requires fasteners and gutter sealant (not included)
- Note: Adjoining gutters should be cut accordingly to provide a single seam corner.

Box Miter

Description

TopShield[®] Aluminum Box Miter is designed to connect two sections of a gutter to form a 90-degree corner where applicable.

Features

- Available in inside and outside configurations
- Sizes include 5 inch and 6 inch
- Allows for two separate gutters to connect at a 90-degree angle
- Baked-on finish for low maintenance
- Fits most residential gutter systems
- Over 20 colors available
- Sealant, fasteners and seamer required for installation (not included)
- Note: Two straight cuts to the current gutters will provide easier installation of the box miter.

- Easily attachable with downspout bands (not included)
- Baked-on white finish for minimal maintenance
- Crimped at one end for straightforward connection
- Available in sizes 2"x 3", 3"x 4" and 4"x 5"
- Crimped at one end for easy connection

Offset Ledge Jumper

Description

TopShield[®] Offset Ledge Jumper is a versatile solution for extending your downspout outward, particularly when faced with obstacles such as ledges on your wall. Additionally, these jumpers play a crucial role in connecting your downspout to the gutter in situations where space is limited for two elbows. Offered in both Type A and Type B configurations, these jumpers come in a variety of colors across all sizes, ensuring flexibility in coordinating with your home's exterior.

Features

- Available in Type A and Type B
- Diverse range of colors
- Provides flexibility during installation
- Available in sizes 2"x 3", 3"x 4" and 4"x 5"
- Minimal maintenance required
