

Gutter Guard™

Covers, Screens & Filters

Aluminum Perforated Gutter Cover

Description

TopShield® Aluminum Perforated Gutter Cover recesses into the gutter and fastens to the front for easy debris control.

Features

- Highest debris capacity
- Secure front fastening with screws
- Handles the most significant water volume
- Features channels for effortless airflow, aiding debris drying and removal
- Sturdy, perforated .019 aluminum with a painted finish
- No disruption to shingles during installation

Size

Available in 4, 6 and 10 Ft. lengths and 5, 6 or 7 inch widths

Color

Colors include White, Mill Finish and Black

Powder-Coated Steel Gutter Screen

Description

TopShield® Powder-Coated Steel Gutter Screen is designed to lock into the gutter without disturbing the shingles while preventing debris from entering.

Features

- Small-sized openings for handling moderate debris levels
- Constructed from powder-coated steel
- Made from .028 gauge expanded galvanized steel

Size

Available in sizes 5"x 4' and 6"x 4'

Color

Black

Stainless Steel Leaf Gutter Filter

Description

TopShield® Stainless Steel Leaf Gutter Filter is designed with horizontal beads and vertical ribs to add strength with a flex-point that self-adjusts to various roof pitches.

Features

- Easily tucks under shingles for simple installation.
 - Utilizes a durable stainless steel mesh that resists corrosion, serving as an efficient gutter filter.
 - Sturdy aluminum edges securely lock onto the mesh with a continuous bead.
 - Innovative vertical ribs and horizontal beads, with a patented design, enable the mesh to adapt to the roof pitch.
 - The patent-pending Water Separator/Debris Lifter directs rainwater through the screen into the gutter.
 - The unique patent-pending Reverse Arch design lets water pass through and lifts debris over the gutter's front, aligning with the roof's slope.
- *It comes complete with stainless steel screws

Size

Available in sizes 5"x 4', 6"x 4', and 7"x 4'

Stainless Steel Snap in Filter

Description

The TopShield® Stainless Steel Snap-in Filter is the only stainless steel gutter filter that easily snaps into place, securely attaching to the mesh with a patented reverse arch design, eliminating the need for extra bending during installation.

Features

- Snaps in and out of the gutter easily for quick installation and maintenance.
- Spring tension strengthens the filter and accommodates large debris.
- Sturdy aluminum edges secure the mesh with a continuous bead lock.
- The unique patent-pending inverted arch directs water into the gutter.
- The sloped profile at the front of the gutter helps shed debris.
- This filter is made of corrosion-resistant, heavy-gauge stainless steel mesh.

Size

Available in sizes 5"x 4' and 6"x 4'
