

STANDARD PLASTIC CAP

Plastic Cap Roofing Fasteners

PRODUCT DATA SHEET

PRODUCT NAME

Pre-assembled Plastic Cap Nails

DESCRIPTION

Nails: steel, electro galvanized for additional corrosion resistance, with diamond point and round annular grooved ring-shank for increased holding power.

Plastic Cap: large round plastic head is ideal for holding roofing felts, other roofing materials, sheathing and other building components in places that are prone to tearing when attached with a regular nail.

Plastic Cap Nails	TOP112PC25BTS

FEATURES

- Strong outer rim for increased rupture values.
- Minimizes the heat sinking effect of metal to the building materials
- Annular ringed shank for additional pull-out resistance
- Easy installation and use
- Round head will not puncture roof membrane
- Meets the requirements of ASTM F1667-13

PULLOUT RESULTS (average)

Average Resistance (lbs)	Smooth Shank	Annular Grooves
1/2" Plywood	81	155
3/4" Plywood	99	224
2" Pine boards	67	190

FINISH

Electro galvanized (standard)

USES

- Roofing Felt Fastener
- Board Insulation Fastener
- Insulative Sheathing Fastener
- House Wrap Fastener
- Base Sheet Fastener
- Structural Sheathing Fastener
- Radiant Barrier Fastener
- Vapor Barrier Fastener
