GABLE VENTS OFFER PERFORMANCE, STYLE, VERSATILITY AND PROTECTION

PERFORMANCE

TopShield® Gable Vents offer key features that have become the benchmark in the industry. Installation is easy with our wide nailing flange, leveling lines, adjustable stop gauge and snap-on trim ring. The snap-on trim ring hides rough cuts and reduces installation time, while providing a finished appearance once the vent has been installed. Each gable vent has more Net Free Ventilation Area for optimal venting than industry standards.

STYLE

TopShield® gable vents provide added architectural detail with their wood grain finish and sharp distinctive features. Choose from the most styles, sizes and colors in the industry to accent your home beautifully. Gable vents are also available in a paintable option for a custom look. These vents are easy to paint with a primer and acrylic paint.

VERSATILITY

Installation is easy on all types of siding including vinyl, wood, fiber cement, stucco, brick or stone. Our gable vents work well in both new construction and remodeling applications. You also have the option of installing gable vents with a decorative application, when a functioning vent is not required. You can either install the vent over a substrate without cutting a vent hole or use the Non-Functional Gable Vents with closed louvers.

PROTECTION

Our vents feature a double baffle design that blocks a direct view into the home and provides added protection against wind-driven rain and snow. The sealed-in fiberglass screen offers complete insect and animal protection.
