TS750-GES FEATURES

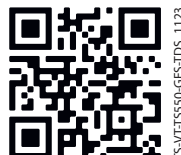

- Steel construction that has been galvanized.
- Improved protection against weather.
- A nailing flange of considerable size, measuring 6 inches.
- A mesh screen with a nominal thickness of 1/16".
- Suitable for roof pitches ranging from 2/12 to 16/12.
- Resistant to weather and birds.
- Its design prevents the discoloration of the roof.
- Enhanced airflow is provided by the stack effect and three louvered sides.

The **TopShield 750-GES Roof Vent** incorporates three side vents that discharge air outward and upward. This innovative design effectively eliminates the unsightly roof streaking often associated with typical roof louvers. Moreover, it effectively prevents issues related to birds and animals infiltrating your attic, all while ensuring optimal airflow for attic exhaust and enhanced weather protection.

Model	Overall Size (in.)	Opening Size (in.)	NFA (in. ²)
